The Suwada Orchid Nursery Cattleya Collection

Suwada Orchid Nursery is the longest standing orchid nursery in Japan. Now in its third generation, Suwada Orchid Nursery keeps expanding and supplying orchid enthusiasts in Japan and the world over with quality plants. Currently managed by Munekazu Ejiri, the quality of the hybrids produced at this nursery can be seen in all the J.O.G.A. (Japan Orchid Growers Association) awards as well as awards in other countries. Like many of the Japanese orchid nurseries they are more hobbyist-driven in contrast to mass production as seen from so many of the Taiwanese nurseries. Although one can buy a wide range of species and hybrids of other genera from Suwada Orchid Nursery, Cattleya hybrids are where their strength lie having been in the hybridising game since 1965. We are very proud to offer the following flowering size mericlones as a limited release:
